

PISSARO

Forecasting extreme events in the southwest Indian Ocean on a monthly scale

Review of the cyclone hazard anticipation product for the 2021-2022 season

Hélène Vérèmes

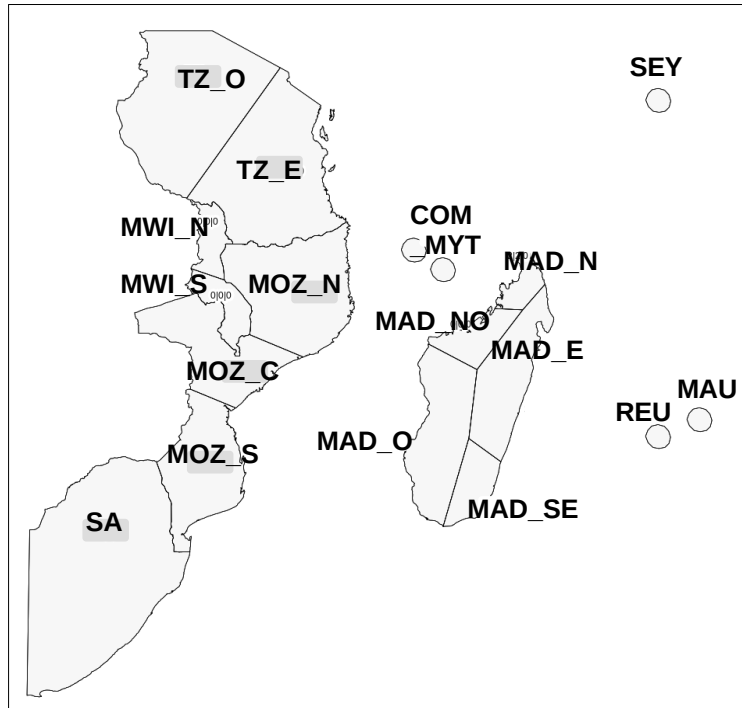

Email: helene.veremes@univ-reunion.fr

The product

Cyclone hazard anticipation product for inhabited areas
of the southwest Indian Ocean

**Produit d'Anticipation de l'aléa Cyclonique pour les Territoires habités
du Sud-Ouest de l'Océan Indien (PACT-SOOI)**

Colour levels express an increasing degree of reliability of the cyclone signal

Niveaux de couleur expriment un degré de fiabilité croissant du signal cyclonique

Time ranges:

Week 1 (W1) = D+7 to D+13

Week 2 (W2) = D+14 to D+20

Week 3 (W3) = D+21 to D+27

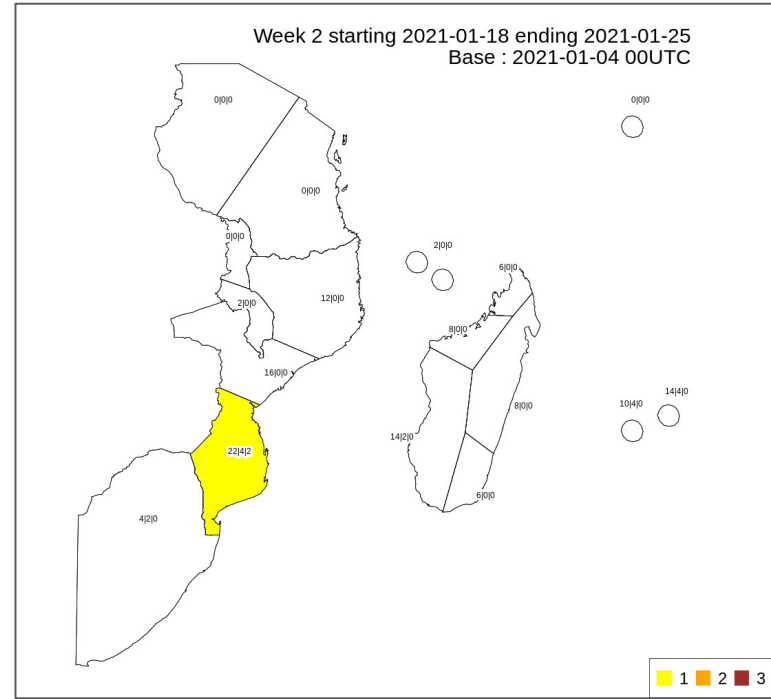

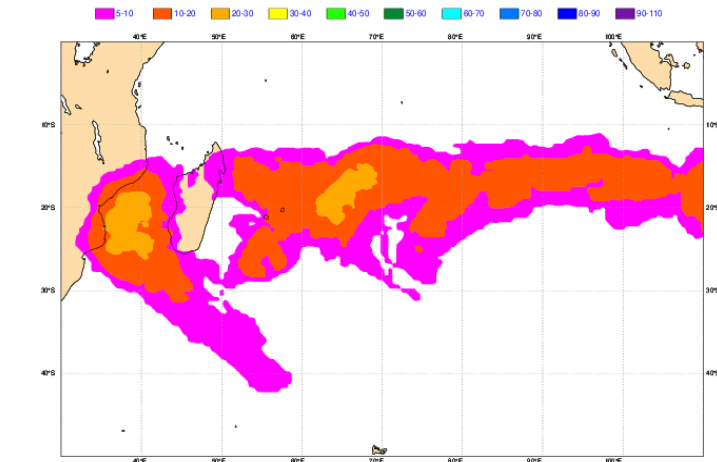

Example of the product

New product

production by
F. Bonnardot**

The start of cyclone activity for the 2021-2022 season

No signal (any colours) for inhabited land before the run of 20 December for the week of 10 January

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

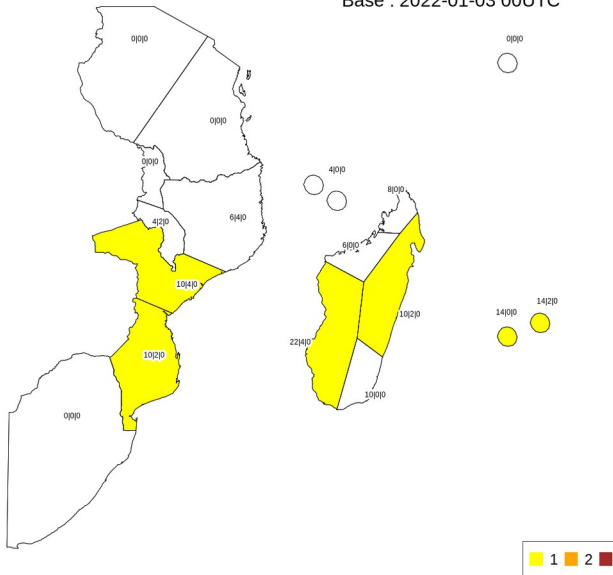

The start of cyclone activity for the 2021-2022 season

Persistent (albeit yellow) signal from week to week from the run of 10 January for the week of 24-31 January

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 3 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-03 00UTC

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 2 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-10 00UTC

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 1 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-17 00UTC

Observation of the start of the season

1st system on 17 Jan week - 1st tropical storm (ANA) on the 24 January week - 1st impact on land on the 24 January week
Signal consistent with start of season but just infomative (yellow colour) for the user as yellow level

ANA (20 to 26 Jan. 2022)

[At least storme stage: 24/01 00UTC - 24/01 12UTC]

[Potential impacts: yes]

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 1 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-17 00UTC

Week 2 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-10 00UTC

Week 3 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-03 00UTC

**Matching (with early signal on
Reunion / Mauritius from BATSIRAI)**

ANA (20 to 26 Jan. 2022)

[At least storme stage: 24/01 00UTC - 24/01 12UTC]

[Potential impacts: yes]

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 3 starting 2022-01-24 ending 2022-01-31
Base : 2022-01-03 00UTC

BATSIRAI (24 Jan. to 10 Feb. 2022)

[At least storm stage: 27/01 00UTC - 05/02 18UTC][Potential impacts: yes]

Matching (when considering early signal
on Reunion / Mauritius from BATSIRAI)

BATSIRAI (24 Jan. to 10 Feb. 2022)

[At least storm stage: 27/01 00UTC - 05/02 18UTC]

[At least storm stage: 07/02 12UTC - 08/02 06UTC]

[Potential impacts: yes]

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 3 starting 2022-01-31 ending 2022-02-07
Base : 2022-01-10 00UTC

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 2 starting 2022-01-31 ending 2022-02-07
Base : 2022-01-17 00UTC

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 1 starting 2022-01-31 ending 2022-02-07
Base : 2022-01-24 00UTC

Matching

BATSIRAI (24 Jan. to 10 Feb. 2022)

[At least storm stage: 27/01 00UTC - 05/02 18UTC]

[At least storm stage: 07/02 12UTC - 08/02 06UTC]

[Potential impacts: yes]

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

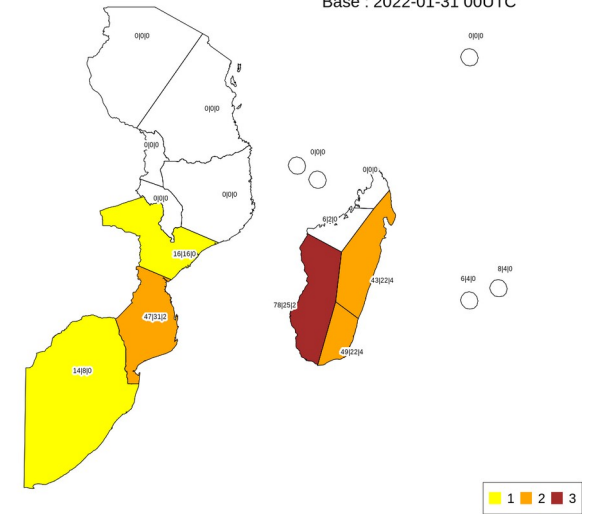

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 3 starting 2022-02-07 ending 2022-02-14
Base : 2022-01-17 00UTC

Week 2 starting 2022-02-07 ending 2022-02-14
Base : 2022-01-24 00UTC

Week 1 starting 2022-02-07 ending 2022-02-14
Base : 2022-01-31 00UTC

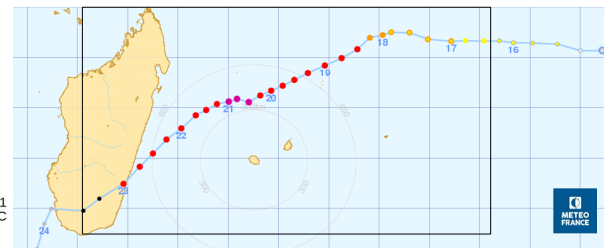

**Could match (for DUMAKO, limit
of the 300 km radius and date)**

**Idem but no signal of BATSIRAI
In the Mozambique Channel**

**Matching for Madagascar
But wrong on Mozambique**

EMNATI (15 to 27 Feb. 2022)

[At least storm stage: 17/02 00UTC - 23/02 00UTC][Potential impacts: yes]

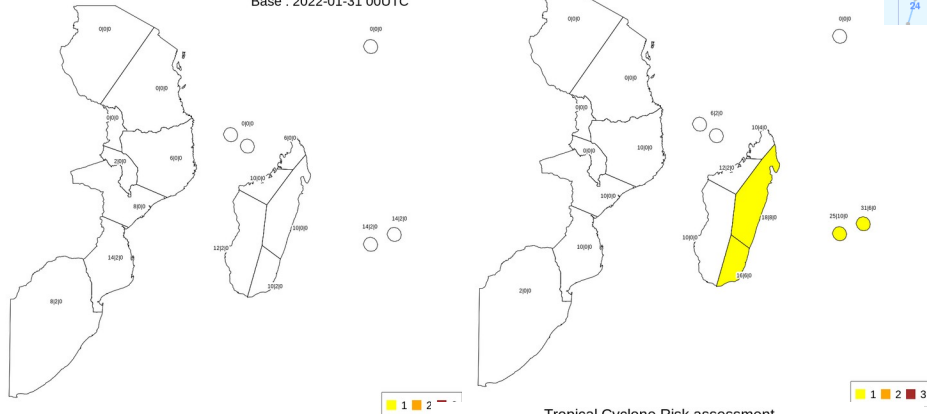

Tropical Cyclone Risk assessment based on ECMWF monthly extended forecast

Week 3 starting 2022-02-14 ending 2022-02-21
Base : 2022-01-24 00UTC

Tropical Cyclone Risk assessment based on ECMWF monthly extended forecast

Week 2 starting 2022-02-14 ending 2022-02-21
Base : 2022-01-31 00UTC

Tropical Cyclone Risk assessment based on ECMWF monthly extended forecast

Week 1 starting 2022-02-14 ending 2022-02-21
Base : 2022-02-07 00UTC

Matching (DUMAKO for Madagascar And EMNATI for Reunion and Mauritius)

Tropical Cyclone Risk assessment based on ECMWF monthly extended forecast

Week 3 starting 2022-02-21 ending 2022-02-28
Base : 2022-01-31 00UTC

Tropical Cyclone Risk assessment based on ECMWF monthly extended forecast

Week 2 starting 2022-02-21 ending 2022-02-28
Base : 2022-02-07 00UTC

Tropical Cyclone Risk assessment based on ECMWF monthly extended forecast

Week 1 starting 2022-02-21 ending 2022-02-28
Base : 2022-02-14 00UTC

Matching for orange zone But in the limit of the 300 km Distance, wrong for Mozambique

GOMBE (6 to 17 March 2022)

[At least storm stage: 09/03 00UTC - 11/03 00UTC][Potential impacts: yes]

Missed

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 3 starting 2022-03-07 ending 2022-03-14
Base : 2022-02-14 00UTC

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 2 starting 2022-03-07 ending 2022-03-14
Base : 2022-02-21 00UTC

Tropical Cyclone Risk assessment
based on ECMWF monthly extended forecast

Week 1 starting 2022-03-07 ending 2022-03-14
Base : 2022-02-28 00UTC

Remarks

Summary

- Signal on the TCs of the most intense part of the season, less prediction at the end
- Only 3 predictions with level 2 alert (W1;W2) and 2 predictions with level 3 alert (W1;W3)
- Good signal of the effective start of the cyclonic season

Outlooks

- Needs to calculate scores by comparing with the BT
 - especially for cyclonic episodes with impacts (database being updated by E. Clerissi)
- Difficulty in doing a situational replay
 - test of the product in operational conditions. Next season? How? (internship of E. Clerissi)
